## DECORATIVE SORTED-WASTE CONTAINERS

# BIOX

Discreet and rational containers that improve the functionality and appearance of the areas reserved for sorted waste collection. Inside, they hold the wheeled containers necessary for mechanized emptying. The top lid facilitates the controlled insertion of the waste. Biox can be positioned in streetside areas or outside apartment buildings; it can be fastened to the ground and ranged in rows, thanks to its square shape.

### TECHNICAL CHARACTERISTICS

**Material:**

- galvanized sheet steel coated with epoxy powders, heavy-metal free

**Container:**

- parallelepiped with front door and sloping top with hinged lid for the charging mouth

**Process:**

- laser cutting of steel sheet, CNC press-bending, TIG-welding, coating, assembling

**Base:**

- with rubber adjustable feet and fitted for fastening to the ground

**Body:**

- assembled panels

**Door:**

- on front side, with concealed hinges and lock with triangular key

**Lid:**

- shaped with a sloping angle to allow water to run off and to prevent setting the waste on it

**Charging lid:**

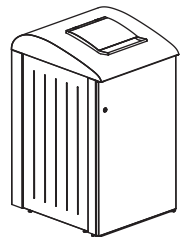

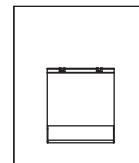

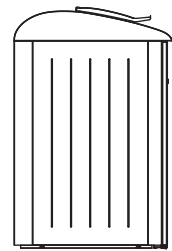

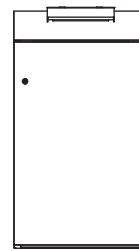

- the hinged lid is opened upward by acting on a front handle
- hydraulic absorber allowing the lid to close silently and safely
- size of charging mouth: 295x215 mm

**Standard colour:**

- ancient marble brown; other colours on request

**Options:**

- inside container of MGB type for mechanized emptying
- key lock on charging lid
- decals with designs and instructions for use
