ORGANIC WASTE

MINIMAX

A series of coordinated containers for sorted organic waste collection. The wide range available allows a countless number of solutions, from daily separation of organic kitchen waste to door-to-door collection services.

TECHNICAL FEATURES

Material:

- virgin or reprocessed polypropylene, non-toxic and 100% recyclable, UV-treated

Manufacturing process:

- injection moulding

Main body:

- square-tapered towards the bottom and rounded edges
- perfectly smooth internal and external surfaces
- lower-set hinges to easily hook the liner over the whole upper perimeter of the bin

Lid:

- double-hinged to the body by means of hinge pins
- total lid opening 270°
- supplied already assembled on the body

Handle:

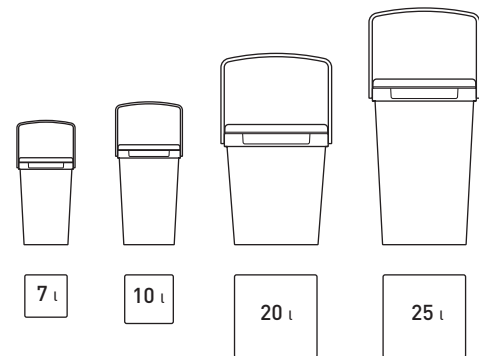

- for 7 and 10 l versions: in ABS with variable cross-section
- for 20 and 25 l versions: in polypropylene, with 20x12 mm tubular structure and variable cross-section, made with air-moulding technology
- self-locking system of the lid and automatic opening in emptying phase

Standard colours:

- brown, green
- other colours upon request for minimum quantities

Options:

- adhesives kit
- customized hot-printing
- progressive numbering or identification code bar
- application kit for transponder (only for 20 and 25 l versions)

Colours

Model	Nominal capacity	Width	Depth	Height	Height with vert. handle	Empty weight
MRA00080xx	7 l	205 mm	210 mm	255 mm	385 mm	0,39 kg
